Instruction Manual

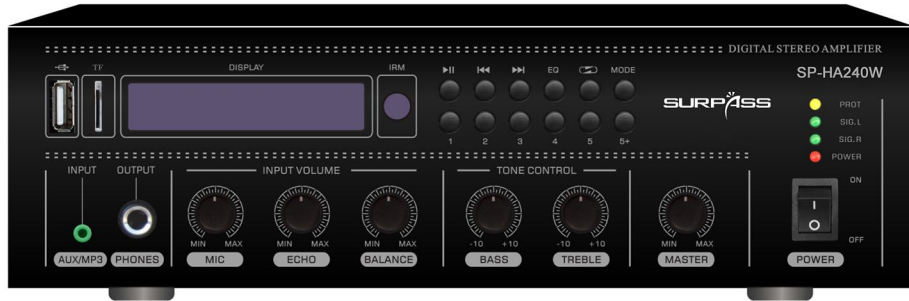

Digital Stereo Mixer Amplifier with Wi-Fi/Bluetooth/Mp3/USB/TF/FM/AUX IN

Specifications

Rated Power	2*40W at 8 ohm	
Sensitivity	AUX/USB	360mV
	WIFI	330mV
THD	<0.5%	
Frenquency Response	20Hz-20KHz under 1/8 RMS	
S/N	75dB	
AUX/REC Line out	420 mV	
Tone Control	Treble	±10dB
	Bass	±10dB
Dimension	260mm*235mm*80mm	
Net Weight	1.8 kg	

A triangle with an exclamation mark draws the use's attention to important instructions for use and maintenance in the accompanying manual.

A triangle with a lightning symbol draws the use's attention to"dangerous voltage"without insulation in the cabinet which may be high enough to entail a risk of electic shock.

Warnings：
· Do not expose the product to rain or moisture

# WIFI Connection (Shift to WIFI mode，Install the MUZO App onto your phone)
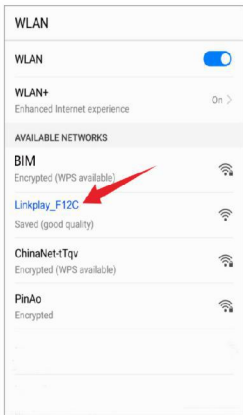

Step1：
Search amplifier's WiFi "Linkplay_xxxx" on your phone, and click it to connect the amplifier with your phone.
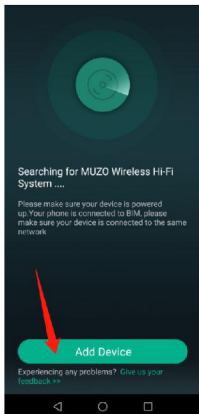

Step2：
Re-start the MUZO App and click "Add Device" to connect the amplifier to your wireless router.
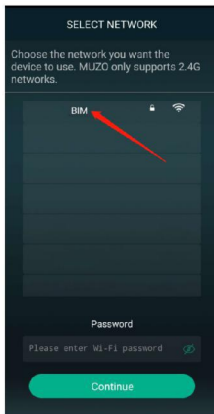

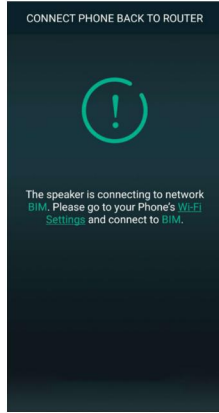

Step3：
Select your located router and connect the amplifier to it. Here take [BIM] as an example of your router name.
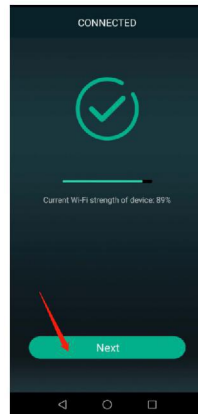

Step4：
Click "Next" after the amplifier is connected with WiFi 'BIM'.

**Step5：**
Choose a connected amplifier to control.

Step6:
This reminds you that your phone must be connected to the same router which the amplfier had connected to.
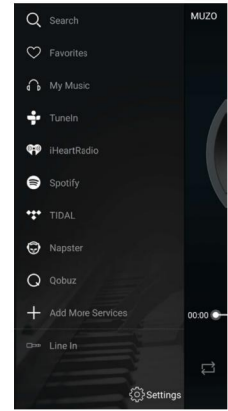

Step7:
Disconnect your phone from the amplifier and connect your phone to the router 'BIM' .You can only control the amplifier while your phone and the amplifier are both connected with a same router.
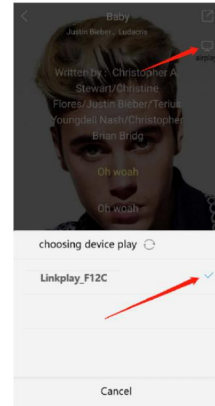

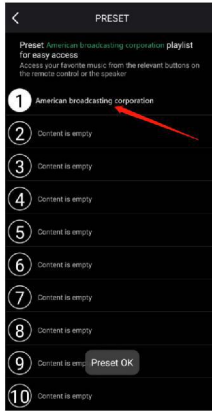

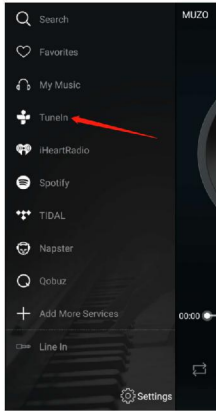

Step8:
Return to the MOZU App interface and start to control the amplifier wirelessly.

Step9:
For example,you can click and enter "Tuneln" to choose any of your favourite local radios.
The' Line in' on the botton can not be selected.

8

WiFi Preset & Airplay

WiFi Preset:
Click the preset icon on the right side of a radio station to enter the preset interface, you can preset up to 10 favorite stations. Then you can use the number buttons/keys to enter the preseted stations directly.

Airplay：
After the amplifier being connected .You can also use other music app on your phone such as "Spotify/Apple Music" etc. to stream music to the amplfier by airplay.

AUX

Function	Operation on Amplifier	Operation on Remote
Connection	Connect any external media resources to the amplifier via audio cord. And shift the amplifier to AUX mode.	

Troubleshoots

- **Volume is too low.**
  Please notice that there are volume adjustment on both the amplifier and remote.check if you has adjusted one to be very low.
- **The sound is intermittent.**
  This amplifier has an overload protection function when it is overloaded,the yellow protection indicator is on and the amplifier cuts off audio output. This mostly happens when you are connecting with 4ohm speakers. Please turn down the volume when overload.
- **Left and Right channel sound is unbalance or one side is mute.**
  Please make sure that the L/R balance is adjusted in the middle postion.
- **For any other questions/ issues that we did not mention in this manual.**
  Please contact with the local agent.
